Benefits Over Features

Ultra High-Definition Recording – Our system can accommodate resolutions as high as 4K and captures high-quality images. This way, it allows for easier identification of important details in security footage.

Enhanced Data Management with DVR – Our product's Integrated Video Recording (DVR) technology ensures efficient data storage and retrieval and provides a dependable solution for recording crucial moments. Our system allows up to 8TB of hard disk storage and has a network bandwidth of 150 MBPS.

Multi-Channel Support – Our DVR for CCTVs connects up to 32 cameras for exhaustive coverage (perfect for large spaces) and reduces blind spots in your surveillance network. Our channel supports Onvif and is compatible with every CCTV Camera.

Reliable Performance in Diverse Conditions – Our 32 Channel DVR is built to work effectively in diverse settings, guaranteeing steadfast surveillance quality.

Addressing Pain Points

Scalability for Growing Security Needs – Its scalability caters to the expanding security requirements of businesses and properties, making it a sustainable long-term investment.

Simplified Monitoring of Large Areas – Our multi-channel capability of our 4K DVR for CCTVs simplifies the task of monitoring extensive areas. It provides an integrated view.

Ease of Integration with Existing Systems – Its c,32 Channel DVR is compatible with multiple camera models. This way, it ensures easy integration into existing security setups.

Reduced Need for Multiple Systems – Our support consolidates surveillance into one powerful system, reducing the complexity and cost of managing multiple security setups.

Enhance your security while reducing effort with Trueview 32 Channel Ultra DVR. With its advanced system, experience the power of surveillance clearly and capably!
