

24+2+1 Port Layer 2 Managed AI PoE Switch

- 24 10/100/1000Mbps RJ45 port support PoE+
- Support VLAN
- Bandwidth : 52Gbps
- Each port max. power supply reached 46W
- Adopt store-and-forward exchange method With power circuit protection, protect the safety of PD
- Zero configuration characteristics of the power supply is automatically Supplied to the adaptive equipment
- Support port without link power saving function
- All ports have wire-speed forwarding capability
- Support lightning protection 6KV

Benefits Over Features

Enhanced PoE Ability – Our PoE Switch is designed to provide efficient power over Ethernet. Its enhanced PoE capability ensures that the connected devices receive a consistent power supply without any need for additional electrical wiring.

High-Speed Data Handling – Our PoE Switch is engineered to ease out high-speed data transfer. It is essential for the smooth operation of devices such as Interactive Panels and surveillance cameras including Solar CCTV Camera, ensuring optimal function.

Versatility in Application – Our PoE Switch is adaptable to a wide range of settings. It offers reliable network stability and connectivity, enhancing the functionality of connected devices.

Consistent and Reliable Performance – We have designed our PoE Switches with reliability in mind. They guarantee consistent operation and uninterrupted service in a wide range of settings and environments.

Addressing Pain Points

Network Reliability in Diverse Settings – Our PoE Switch is designed to provide stable network connections in various environments. It is particularly relevant for the places where conventional power sources are inconsistent. It is an ideal solution for powering devices including a Solar CCTV Camera in remote or rural locations.

Eco-Friendly and Energy Efficient – The switch's energy-efficient PoE technology acknowledges environmental concerns, offering a sustainable solution for powering devices.

Seamless Connectivity Across Multiple Ports – With its 24+2+1 port configuration, our switch ensures fast and reliable network connections for an array of devices.

Easy Installation and Minimal Maintenance – Our PoE Switch is easy to install and has low maintenance requirements. This user-friendly approach minimises the need for technical expertise and accelerates deployment. This switch is thus a practical choice for various applications.

Trueview 24+2+1 Port Layer 2 Managed AI PoE Switch – The smart, sustainable solution for powering Interactive Panels and Solar CCTV Cameras anywhere, effortlessly. Reliability and efficiency guaranteed!
