

36 Channel IVR Support up to 4K

- 36 Channel IVR Support upto 4K IPC, H.265 IVR
- 16ch at same time Playback
- Support H.264/H.265
- Support P2P cloud service
- Instant playback under preview screen without affecting other channel preview
- Supports disk grouping quotas and disk group storage modes
- Support channel grouping, preview tour
- Support ONVIF protocol, support High profile S, High profile G, compatible with different IP camera that based on ONVIF, RTSP standard.
- Support Alarm In-Out
- Support Two-Way Intercom
- Support instant playback for screen preview during multi-channel display mode.
- Network Bandwidth: 216 MBPS
- Support IPC front-end intelligent analysis:
Target Count, Object Left/Lost, Electronic Fence, Line Crossing, Humanoid Detection

Benefits Over Features

High-Resolution Imaging – Our 36 Channel DVR supports up to 4K resolution for detailed and crystal-clear imagery. This aspect allows precise identification of subjects and objects, providing high-level surveillance performance. It also aids in effectively storing the recorded footage for any kind of future reference. Moreover, with enhanced surveillance capabilities, it makes sure that critical details are captured with the utmost clarity and accuracy.

Efficient Data Management – The advanced DVR technology aids in optimising storage space. Our 36 Channel DVR only records relevant footage, which in turn not only reduces storage costs but also simplifies data management. This way, by eliminating unwanted footage, it avoids wasting storage spacing and provides efficient data storage solutions. It also allows operators to access the required footage effectively and handle it for future uses as well.

Scalability and Integration – Our 4HDD DVR for CCTVs offers scalability to accommodate your growing needs for expanding surveillance networks. By providing flexibility for future growth and system upgrades, it helps maintain an accommodative network. It also enables a smooth and hassle-free integration with your existing CCTV infrastructure.

Addressing Pain Points

Streamlined Surveillance Operations – Our 36 Channel DVR simplifies surveillance operations with intuitive controls and a user-friendly interface, reducing the workload on security personnel. It also enhances situational awareness and response capabilities, ensuring efficient management of multiple cameras.

Enhanced Security Measures – Our DVR for CCTVs provides comprehensive surveillance coverage to address security vulnerabilities and blind spots. It facilitates proactive surveillance measures by minimising security risks and deterring potential threats. This way, it enables swift incident response and ensures a safe and secure environment.
