4+2 Port AI PoE Switch

• 4+2 Port AI PoE Switch
• 4*10/100Mbps PoE ports, 2*10/100Mbps uplink port
• Support IEEE802.3af/at
• Support restrain network storm, VLAN function
• Support Max Transmission distance up to 250m with PoE Power
• ll port supported by MDI/MDIX auto flip and self-negotiation
• Built-in power supply
• Maximum power of single PoE port: 30W
• Maximum PoE power: 78W
• Adopts store-and-forward architecture With power circuit protection, it can protect the security of the back-end equipment
• Fan less, natural cooling, small, compact and quiet design, suitable for desktop or wall
• Support lightning protection 2000V

Benefits Over Features

PoE Efficiency – Our PoE Switch enables efficient and consistent functioning of a Solar Powered CCTV Camera without requiring separate electrical wiring. This simplifies the installation process by reducing complexity.

High-Speed Connectivity – Our PoE Switch is engineered to easily handle high volumes of data, making it ideal for use with high-performance devices such as CCTV Cameras and Interactive Panels in both home and business settings. With its robust capabilities, you can trust that your data will be transferred efficiently and securely, providing you with the peace of mind you need regarding your network.

Adaptability – This switch is an extremely versatile networking solution that can be used in various scenarios. It's designed to ensure seamless connectivity and network stability, so you can always count on it to perform at its best. With four 10/100Mbps PoE ports and two 10/100Mbps uplink ports, this switch is the perfect choice for businesses and individuals with a wide networking needs.

Reliability – Our switch is designed to provide reliable, high-performance connectivity for devices such as CCTV cameras and Interactive Panels. We prioritize consistency and stability to ensure these devices operate smoothly and without interruption, enabling our customers maximum uptime and efficiency.

Addressing Pain Points

Network Stability in Remote Areas – Our 4+2 Port AI PoE Switch is designed to provide stable connectivity in areas with scarce traditional power sources, efficiently powering devices including a Solar Powered CCTV Camera and other critical surveillance devices.

Eco-Friendly Operations – The energy-efficient PoE technology makes our product an environmentally conscious choice.

High-Speed Connectivity Across All Ports – This feature ensures fast and reliable network connections for a wide range of devices, including a Solar Powered CCTV Camera, a Wifi CCTV Camera for Home, Interactive Panels and other such devices.

Easy Installation and Maintenance – Our 4+2 Port AI PoE Switch is user-friendly, designed for easy setup and low maintenance, catering to both technical and non-technical users.

Trueview 4+2 Port AI PoE Switch – Transform your security and connectivity. Ensure your peace of mind in every pixel!
