Crucial led the market with an 11 per cent share, followed by EVM at 10 per cent, and Kingston in the third position with an 8 per cent share.

According to the CMR research, the overall SSD market in India is expected to experience substantial growth of 35 per cent year-on-year by the end of 2024. This growth is driven by the increasing demand for faster and more reliable storage options, fueled by a rapidly expanding digital economy and the widespread adoption of multimedia applications.

Vishal Hundia, CEO of EVM, shared his enthusiasm for the future of the SSD market, stating, "We at EVM, an Indian IT Storage brand, are honored to receive the Leading SSD Brand of 2023 Award. This recognition underscores our dedication to delivering cutting-edge solutions that redefine data storage standards. The Indian SSD market is poised for significant growth driven by the rising demand for high-performance computing solutions. We believe that effective marketing and educational initiatives will be crucial in raising consumer awareness and driving the adoption of Indian-brand SSDs among Indian users."

Demonstrating a commitment to the Indian market, EVM provides SSDs with an included five to ten-year lifetime warranty, offering users prolonged peace of mind. This warranty underscores the product's durability and reliability, assuring Indian professionals of a trusted high-speed storage solution for years to come.

With the aim of growth we also take the responsibility for our actions and a positive impact towards the substantial world, to help and to balance the economic prosperity and social progress. Thus we initiate to help out cancer children by our program under “Buy One, Give Ten.”

We focus on providing support to the cancer children bearing this burden of the disease they suffer through donating Rs.10 on every product we sell. Providing best diagnosis and treatment is not sufficient since the cancer fees are recommended high. Therefore we have been making efforts to minimise pain as well as keep children in a positive frame of mind.
